

NEW PRODUCTS FLAVORED IN TWO DAYS – YEP, 48 HOURS.

sensapure
FLAVORS

**Let's work together to create your next
industry leading product. If you can
imagine it, Sensapure can help build it.**

How did we get so fast?

Before being spun off as a stand-alone flavor house in 2017, Sensapure Flavors began as the applications department for one of the largest manufacturers of nutritional supplements in the country. Working with leading sports nutrition brands to customize and innovate their products, the Sensapure team learned how to concept, test and develop new flavors in real time. As part of the manufacturing process, we learned to work fast. Really, really fast.

48 Hours confident

Imagine this scenario: You have developed a new base. Bigger, faster, stronger. Now it just needs to taste great. Your team looks through their library, but can't see a way to make it work. You need flavoring help, and you need it fast. How confident are we of our ability to deliver amazing concepts? This confident. You get us your new base and share your requirements with us, and we'll make it taste amazing and send it back to you in under 48 hours.

What about matching?

Sensapure utilizes both organoleptic and on-site GC MS/MS technology to analyze existing products and flavors. Often, our Flavor Chemists can narrow down the search from the taste itself. And when the certified noses and taste buds leave off, the GC Scanner takes over. While this gas chromatography technology is amazing, it's not quite as simple as the folks on CSI Miami have led you to believe. Every GC project is different, and most projects require a series of scans and analysis to arrive at a target formula.

SAMPLING OF FLAVOR KEYS

Hundreds of unique flavors available
in NAT, N&A and ORGANIC

Apple

Apple Pie
Golden Delicious
Granny Smith
Red Delicious

Alcohol Inspired

Brandy
Irish Cream
Rum
Rum & Coffee
Tequila
Whiskey
